

Yuli Sartika

Front-end Developer

Recently graduated from Glints Academy x Binar Academy coding Bootcamp by taking Front-End Developer class. Within three months of the Bootcamp completion, two projects have been completed in a timely manner. Successfully collaborated with the team to reach our MVP and build a responsive website using HTML, CSS (and ReactStrap Framework), JavaScript, and ReactJs as the main tech stack for the client-side.

Problem-solving

PERSONAL PROJECTS

Lektor Application (02/2021 - 03/2021)

- Lektor is a Learning Management Application where users are welcomed to teach (users as teachers) and learn courses (users as students). Through this app, students will be able to track their learning progress, obtain a certificate of course and assessment completion provided by teachers.
- Repository:** <https://gitlab.com/glints-academy-batch-10/lektur/frontend/front-end-lektur>

Cineflix-App (01/2021 - 02/2021)

- Cineflix-App is a mini application where users are able to see movie lists, watch trailers (and even see and leave reviews which are planned to be developed).
- Repository:** <https://github.com/yulisartika/movie-app>
